Geology and Geohazards in Taiwan
Geology and Geohazards in Taiwan

Interested in field geology or geomorphology?
Interested in environment, society and climate?
Want to visit the tropics over winter break?
Curious about US-China-Taiwan relations?

Field Course and Study Abroad Experience
Winter Break 2019
Geology and Geohazards in Taiwan
Geology and Geohazards in Taiwan

Estimated cost (assuming 12 students): ~$3900, not including airfare

Prerequisites:
One course in geology, geography or permission of the instructor.

Course registration (4 credits):
Fall Registration (1 credit) - GSCI 4999-002
Winter Registration (3 credits) - GSCI 4995
Geology and Geohazards in Taiwan

The Instructors

tim.byrne@uconn.edu

will.ouimet@uconn.edu

Dr. Wang Yu, NTU

Sabbatical
“8 years ago I took a trip that changed my life forever. I didn’t know it at the time but this trip imposed a deep-seated need to travel, to see the world and all its cultural offerings, and most importantly ignited a passion for geology so profound that I’ve made it my life’s ambition. Cheers to Jon Lewis, Tim Byrne, Chung Huang, and David Mirakian for opening up the world to me!”

Ellen Lamont, OSU PhD program
Geology and Geohazards in Taiwan

Comments From Former Students

Best Aspects

“Their enthusiasm for the course”

“The field work was awesome. I learned a lot and loved the way the professors handled field time, course time and free time.”

Best Stops

“swimming beach, pillow lavas, Toroko gorge, mud volcanoes”

Overall

“I thought the course was great”

“Loved this course. Thank you!”

“Awesome experience”
